

How to navigate safely on the internet!

To navigate safely on the internet, you need to be careful on several aspects. Some of them follow:

Don't talk to strangers on the internet and don't send phone numbers and address to strangers. They can disclose all your data with this information.

Don't post content that offends other people and doesn't post fake content.

Save all your files in a safe place, so that they don't get stolen.

Don't open suspicious websites because they can steal your files.

Use a nickname on your online game profile. Don't use your real name or your family's!
